

Statement of Purpose: MBA Application

My name is Yashraj Thakur, and I am a recent graduate with a Bachelor of Engineering (IT) from the Pune Institute of Computer Technology (2024). My passion for technology is undeniable, but my undergraduate experience ignited a desire to delve deeper into the world of business and management.

Academic Foundation and Technical Expertise

While my academic background lies in engineering, my curiosity extended beyond the technical aspects. During my college years, I actively participated in group projects, honing my teamwork skills and fostering a collaborative spirit. My most significant experience was being part of the organizing committee for InC (Impetus and Concepts), our college tech-fest. This role challenged me to develop leadership skills, delegate tasks effectively, and work toward a common goal. In successive years, I served as **Transport and Hospitality Coordinator** in 2022, and progressed to **Hospitality Coordinator with additional responsibilities for billing and accounting** in 2023—roles that underscored the importance of organizational acumen, financial management, and stakeholder coordination.

This experience solidified my desire to bridge the gap between technology and management.

Professional Experience and Industry Exposure

Witnessing the intricate workings of the tech industry further fueled my interest in business. As a **Jr. Software Engineer at Neilsoft Pvt. Ltd.** (July 2024–Present), I have gained invaluable insights into real-world business operations and strategic project management. In this role, I have developed advanced automation solutions using C# .NET Core and WPF, employing MVVM design patterns to streamline workflows for 3D mechanical design models with Autodesk Inventor—significantly increasing project throughput and efficiency. Additionally, I have contributed to the modernization of legacy applications by migrating from C# .NET Framework 4.8 to .NET Core 8, enhancing performance and maintainability. I have also optimized large-scale data management schemas with SQLite, reducing retrieval latency by 15%, and engineered seamless integrations with multiple APIs including Autodesk Inventor, Autodesk Revit, and third-party tools.

This professional experience not only deepened my technical understanding but also exposed me to the importance of a holistic approach to project management, cross-functional collaboration, and continuous process optimization. I realized my true calling lay in a tech-managerial role, where I could leverage my technical expertise alongside business acumen.

Research Contribution and Innovation

My commitment to advancing the field of technology and innovation is further demonstrated through my research publication. I presented a paper titled "**Automated Baggage Storage System**" at the **5th International Conference on Recent Trends in Machine Learning, IoT, Smart Cities and Applications (ICMISC '24)**. This publication, indexed in Springer (DOI: 10.1007/978-981-97-8861-3_40), reflects my capability to contribute meaningfully to contemporary technological challenges. This research experience has strengthened my analytical mindset and reinforced my belief in the importance of innovation-driven problem-solving—a cornerstone of effective tech-management.

Personal Growth and Self-Awareness

My journey hasn't been without its challenges. Initially, I grappled with introversion, which hindered collaboration. However, my participation in events, group projects, and my roles in the InC organizing committee helped me break out of my shell. This experience instilled in me the importance of open communication and teamwork—valuable assets for success in the business world.

Another hurdle I faced was a tendency towards over-analysis, leading to delays in decision-making. To address this, I have actively practiced setting time limits and prioritizing tasks, focusing on the bigger picture. This continuous self-improvement demonstrates my commitment to growth and my readiness to embrace the challenges of a rigorous MBA program.

Why FMS is the Ideal Platform

FMS stands out as the ideal launchpad for my aspirations. The institute's rich legacy of fostering diverse leaders is highly attractive. Its curriculum, designed to address real-world business challenges, perfectly aligns with my goals of transitioning into a technology-driven managerial role. The opportunity to learn from distinguished faculty and gain insights from the esteemed alumni network—many of whom are thought leaders in technology and management—will be invaluable.

Furthermore, FMS's emphasis on global exposure resonates deeply with my desire to make significant contributions in the management field. This international perspective will equip me to navigate the complexities of the global business landscape and understand diverse market dynamics.

Career Vision

My short-term goal is to transition into a techno-managerial role, leading cross-functional teams in technology-driven projects and championing digital transformation initiatives. In the long term, I envision myself heading innovation initiatives in a leading global tech company, driving technological advancements that create tangible business value.

FMS's strong focus on entrepreneurship and innovation fosters the perfect environment for me to develop the necessary skills and knowledge to achieve my long-term vision. The institute's emphasis on practical learning, case studies, and industry collaboration will equip me with the strategic acumen required to navigate complex business landscapes and lead transformation initiatives.

Conclusion

Ultimately, I aspire to utilize my combined technical and managerial expertise to contribute to technological advancements that benefit society at large. My journey—from a tech enthusiast to a professional engineer and emerging leader with research contributions and a steadfast commitment to continuous growth—showcases my dedication and leadership potential.

I am confident that FMS, with its unparalleled academic rigor, exceptional faculty, supportive community, and commitment to fostering leaders who drive innovation, will empower me to achieve my professional goals. I am eager to contribute to the vibrant FMS community and embark on this transformative journey.
